“Touch” Records

You can view the date of records from this section.

The lock being opened at 13:06:12 means it has been opened from inside or by the lock's language.

At 13:05:55, an attempt was made to unlock the lock with the password 456**, but it failed due to an incorrect password entry.

The lock was opened with the "Makfa Private" password at 13:04:59.

Saat 13:04:22 de Daha önce oluşturulmuş geçersiz kart ile kilit açılmaya çalışılmış ama kart geçersiz olduğu için kilit açılmamış

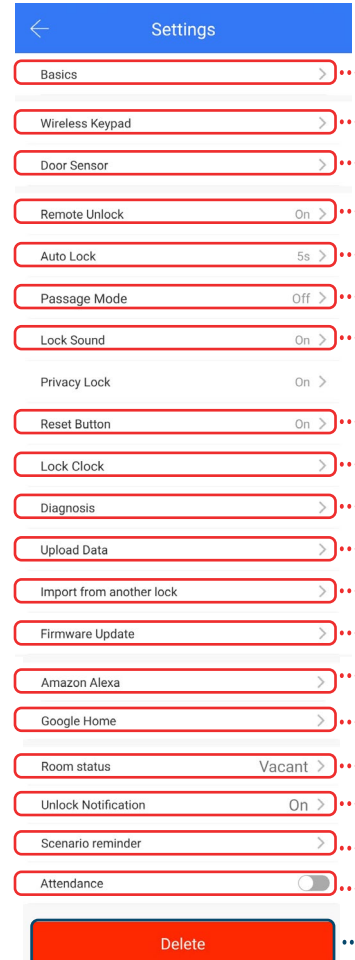

At 13:04:22, an attempt was made to unlock the lock with a previously created invalid card, but the lock remained closed as the card was invalid.

At 13:03:39, the lock was remotely unlocked via the application.

The lock was unlocked via the application at 13:03:29.

OTHER SETTINGS

Touch “Settings”

You can see the lock number, MAC ID, battery, and validity period. You can change the lock name and administrator PIN code, and create a lock group

You can add a wireless keypad as an extra feature to this lock.

It gives an alert and alarm when the door is forcibly opened or when the door is opened and closed. You will need a door sensor for this. You need a gateway to use this feature. If you set the mode to 'Open', you can remotely unlock your lock.

You can add a delay to the lock's locking time.

In the passage mode, you can set the days and hours during which you will leave the lock open. The lock will remain open during that time period.

You can turn the sound from the lock on or off.

If you put the lock in the “Open” position, you can reset your lock with the reset button.

You can update the lock's clock.

It is used when there is an identification problem.

It uploads lock data to the server.

Transfers information about the other lock.

It updates the lock's software.

If you get the gateway device, you can control it with Alexa through voice commands. You can also create routines with your other devices. If you get the gateway device, you can control it with Google through voice commands. You can also create routines with your other devices.

You can set the room status, whether it's vacant or occupied.

This process allows you to receive notifications when the lock is unlocked. You will need a gateway for this.

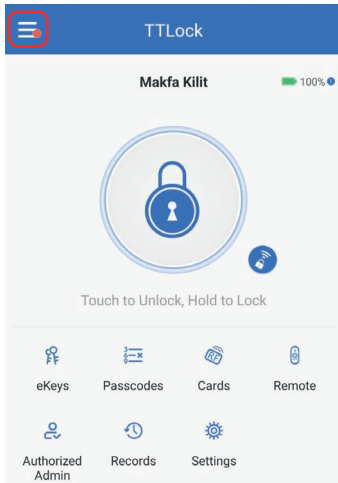

You can set up smart scenarios with this button. You can also configure low battery warnings here.

You can create a company and see when the staff members clock in.

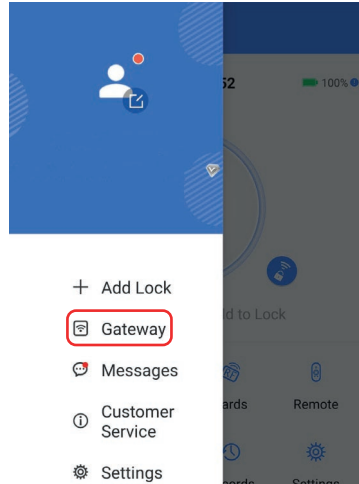

If you touch the “Delete” button, the lock will be deleted.

ADDING GATEWAY LOCKS

- Touch the symbol in the image below.

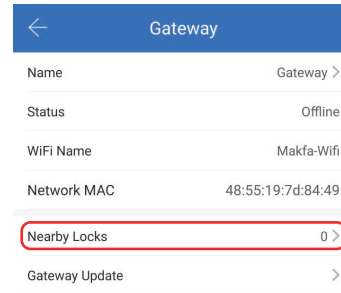

- Touch the Gateway.

- Touch your Gateway.

- Touch "Nearby Locks."

- Slide your finger across the empty white area. Wait.

CHANGING THE BATTERIES OF YOUR LOCK
