- The lock system is very robust and offers highly comfortable usage.
- The locks are suitable for use in modern offices, office buildings, high-end apartments, and villas.
- You can unlock it with a PIN code, card, fingerprint, or mechanical key.
- Optionally, the lock can be opened remotely with a remote control.
- Unlocking modes can be adjusted according to your preference.
- PIN Entry by Pressing the Button
- Microwave wake-up technology
- You can create a 4-9 digit password.
- It operates with an alkaline battery, offering low consumption and a long service life.
- The door lock modules are waterproof, moisture-resistant, and mold-proof.
- The door lock modules have been tested against high and low temperatures, as well as vibrations, making them adaptable to harsh environments.
- External power can be supplied to the lock through the barrel section.
